Bob,

I can't believe I didn't call you. In my mind, I did, more than once. I've been swamped. The cabinet is amazingly beautiful. Beyond words. Karen told me she loved it and I was so happy. I was so excited to see it when I walked in. The wood is magnificent. It's like a pair of shoes that you want to pick up and touch. I am so pleased for her and grateful to you for making such a beautiful and functional piece. It fits perfectly in the room. It's large but doesn't overwhelm the space. the color of the stain works and integrates so well with all the other woods she already has going on. The hardware is terrific. It really keeps the piece updated and looks more like furniture than a stodgy built-in.

Thank you so much for being such an important resource for me and making me look so good in the eyes of my clients. It's also comforting to know that you have done two major jobs in this same space with more than a decade in between.

Many thanks. I look forward to having another qualified client with whom we can work again!!!
Please stay in touch.

SUSAN

Hi Susan,

I hope all is well. It was great working with you again on Karen's project.

I just to see if you liked the way everything came out. I've been flat out and haven't had a chance to touch base.

Have a great day.
